Professional Summary

Front-End Developer with 5+ years of experience building scalable web applications and enterprise e-commerce platforms using React, TypeScript, JavaScript, and modern front-end technologies.

Professional experience includes developing digital products and customer-facing experiences for organizations and brands including KitchenAid/Whirlpool, Honda, Itaú, and Órigo while working at Jüssi, a WPP company.

Experienced in front-end architecture, reusable component systems, performance optimization, responsive development, customized e-commerce experiences, and cross-functional product development.

Currently pursuing a Master's degree in Computer & Information Systems in California and developing FL PsicoFlow, a full-stack SaaS platform that combines software engineering, workflow automation, and generative AI for behavioral health professionals.

Technical Skills

Languages: JavaScript, TypeScript, HTML, CSS

Frameworks: React, Next.js

Backend: Supabase, REST APIs

Platforms/Tools: VTEX IO, Git, GitHub, Figma

Additional: Generative AI, Responsive Design, Accessibility, Performance Optimization

Spoken Languages: Portuguese (Native), English (Professional Working Proficiency)

Professional Experience

Jüssi — a WPP Company | Brazil

Front-End Developer | May 2021 – Oct 2024

- Developed and maintained enterprise digital experiences and e-commerce functionality for KitchenAid Brazil, part of Whirlpool Corporation, using React, JavaScript, CSS, and VTEX IO.
- Led front-end performance optimization initiatives involving legacy CSS architecture, rendering performance, and code maintainability.
- Reviewed and refactored a large legacy CSS codebase, removing redundant styling and simplifying front-end structures to improve performance and maintainability.
- Designed and developed reusable React components to support consistent implementation across the e-commerce platform.
- Developed customized checkout functionality by extending native VTEX capabilities to support business and customer experience requirements.
- Developed authenticated customer account experiences and other customer-facing e-commerce functionality.
- Participated in code reviews, debugging, technical improvements, and continuous platform maintenance.
- Collaborated with developers, QA professionals, designers, marketing teams, and other stakeholders to deliver production-ready features.

Junior Front-End Developer | April 2019 – May 2021

- Developed responsive web interfaces and implemented new functionality for enterprise clients including Itaú, Honda, and Órigo.
- Worked with multidisciplinary development teams responsible for maintaining and evolving production digital platforms.
- Implemented front-end features based on business, design, and technical requirements.
- Investigated and resolved front-end defects across existing applications.
- Participated in debugging, technical improvements, code maintenance, and ongoing platform development.

- Supported the development and maintenance of web platforms for major Brazilian organizations.
- Built responsive interfaces and assisted with front-end implementation and debugging.
- Worked alongside experienced developers in production software development environments.
- Progressed from a Web Development Intern into a full-time Front-End Developer career within Jüssi.

Selected Projects

KitchenAid Brazil — Interactive Content Experience

React • VTEX IO

- Designed and developed a reusable, mobile-first content experience inspired by social media story formats.
- Created an interactive interface allowing marketing teams to present products, recipes, and branded content within the e-commerce experience.
- Developed the functionality as reusable front-end components designed to support different types of content.
- The implementation was subsequently used as a reference for similar digital experiences across other Whirlpool brands, including Brastemp, Consul, and Compra Certa.

KitchenAid Brazil — Customized Checkout Experience

React • VTEX IO

- Developed customized checkout functionality by extending native VTEX capabilities.
- Implemented front-end customizations designed around purchasing workflows and business requirements.
- Worked on usability and interface consistency throughout the checkout journey.
- Integrated customized functionality while preserving compatibility with the underlying VTEX commerce platform.

Independent Product Development

FL PsicoFlow — Founder & Lead Developer | 2026 – Present

Next.js • React • TypeScript • PostgreSQL • Supabase • Generative AI

- • Architecting and developing a full-stack SaaS platform for behavioral health professionals using Next.js, React, TypeScript, PostgreSQL, Supabase, and Generative AI.
- • Designed workflows for patient management, scheduling, sessions, clinical documentation, patient history, and financial tracking.
- • Designed PostgreSQL database structures supporting patients, sessions, clinical records, goals, settings, and related workflow data.
- • Implemented authentication, Row-Level Security (RLS), ownership-based authorization, and user data isolation controls.
- • Developed AI-assisted clinical documentation workflows using generative AI.
- • Implemented data minimization and sanitization controls to reduce unnecessary exposure of sensitive information in AI workflows.
- • Developed automated tests covering application security and user data isolation scenarios.
- • Responsible for product architecture, UX decisions, front-end development, backend integration, database design, security, testing, and deployment.

Education

Caroline University | California, USA

Master of Computer & Information Systems (MCIS) | Expected 2027

Universidade Nove de Julho | Brazil

Bachelor Degree in Computer Science | 2019
